Data Sources:
Shaded relief image derived from a 2 m lidar bare-earth digital elevation model. The lidar was acquired by the Applied Geomatics Research Group, Nova Scotia Community College during a single mission on October 29, 2009. All data acquired using an Optech ALTM 3100 lidar sensor; see Webster et al., 2011 for further details on the lidar processing, surface construction and accuracy validation.

Base and digital data derived from the Nova Scotia Topographic Database (NSTDB). Copyright Her Majesty the Queen in Right of the Province of Nova Scotia. The NSTDB is available from Service Nova Scotia and Municipal Relations (SNSMR), Land Information Services Division (LIS), Nova Scotia Geomatics Centre (NSGC), Amherst, Nova Scotia.
